github.com/AdiSahrulRamadhan • adisahrulramadhan.netlify.app/

Software Engineer focused on full-stack web development and applied data science. Experience building dynamic websites with Laravel, PHP, JavaScript, and MySQL, and decision support applications with Python and Streamlit. Portfolio includes 14 completed projects spanning business operations, education, tourism, health, and agriculture, supported by 28 certificates. Focused on practical applications, maintainable code, and useful data-driven insights.

WORK EXPERIENCE

Research Assistant - Kampus Merdeka **Feb 2026 - Jul 2026**
Bangkalan Regency Department of Agriculture, Fisheries and Food Security **Bangkalan, East Java, Indonesia**

- Built DSS with AHP/Fuzzy AHP for criteria weighting.
- Used TOPSIS to calculate preference scores and rank rice seed varieties.
- Python & Streamlit: CSV/Excel upload, preprocessing, sensitivity analysis.
- Ranking evaluation: Spearman Rank Correlation & NDCG.
- Target users: farmers, extension officers, researchers, policymakers.

Full-Stack Web Developer Intern **Feb 2025 - Jun 2025**
PT. Quantum HRM Internasional **Surabaya, East Java, Indonesia**

- Developed the R&D website from scratch using Laravel and native PHP.
- Built a dynamic profile website with database-driven content.
- Implemented front-end interfaces using HTML, CSS, and JavaScript.
- Developed back-end logic and integrated the database across both websites.

PROJECTS

Subang (Surabaya Bawang) **Jul 2026 - Oct 2026**
Developed a web-based information system focused on Surabaya Bawang commodities and regional needs to support data management, reporting, and field operations. Role: Developer. Technologies: PHP, Laravel, MySQL, JavaScript.

Sistem Pendukung Keputusan Pemilihan Varietas Benih Padi Unggul **Feb 2026 - Jul 2026**
Built a web-based decision support system for selecting superior rice seed varieties using AHP, Fuzzy AHP, and TOPSIS, including sensitivity analysis and ranking stability evaluation. Role: Data Scientist. Technologies: Python, Streamlit, AHP, Fuzzy AHP, TOPSIS, Spearman Rank Correlation, NDCG.

Web HIPPMI (Himpunan Pendidik & Pengajar Muda Indonesia) **Jan 2026 - May 2026**
Developed an education organization website with multi-role administration, organizational profiles, vision and mission, core values, a news portal, and activity management. Role: Developer. Technologies: PHP, JavaScript, MySQL.

Web Profile PT Quantum HRM Internasional **Feb 2025 - Jun 2025**
Developed the official company profile website with fully dynamic pages presenting human resource management services, ERP solutions, financial systems, and warehouse tools. Role: Intern Developer. Technologies: PHP, Laravel, JavaScript, Tailwind CSS.

ASR Printing **Jan 2025 - Feb 2025**
Developed an operational web application for printing services to manage digital order workflows, product customization, and business transaction summaries. Role: Developer. Technologies: PHP, JavaScript, MySQL.

E-Toko Beras - Platform E-Commerce Beras Berbasis Sistem Terdistribusi **Nov 2024 - Dec 2024**
Built a rice e-commerce platform with a decentralized three-tier architecture and 18 CORS-enabled endpoints. Implemented real-time stock management, selective cart functionality, payment validation, and role-based access control (RBAC). Role: Developer. Technologies: React 18 SPA, native PHP 8.1 REST API, MySQL, Docker (php:8.1-apache).

Sistem Terintegrasi Sekolah (SMP) **Aug 2024 - Dec 2024**
Developed an e-classroom platform as the final project for the PPL (Praktik Pengalaman Lapangan) course. Features include attendance, extracurricular management, student achievement submissions, library book borrowing, grade management, and an integrated academic information center. Role: Developer. Technologies: PHP, Laravel, JavaScript.

Monumen Kapal Selam Surabaya **Mar 2024 - Jul 2024**
Developed a historical tourism and e-ticketing platform for visits to KRI Pasopati 410 at Sungai Kalimas, Surabaya. Implemented online ticket purchases, payment validation, and an administrator dashboard with visitor charts. Role: Developer. Technologies: PHP, MySQL, JavaScript, Chart.js, PHPMailer, Google Maps API, Bcrypt.

Klasifikasi Status Gizi Balita (Machine Learning) **May 2024 - Jun 2024**
Built a web application to classify nutritional status in young children using age, weight, and height, combining SMOTEENN data balancing with a Perceptron classifier. Role: Data Scientist. Technologies: Python, Streamlit, Scikit-learn (Perceptron), SMOTEENN, MinMax Scaler.

Prediksi Penyakit Jantung **May 2024 - May 2024**
Developed a web-based machine learning application to predict the probability of heart disease using clinical indicators from a public dataset. Role: Data Scientist. Technologies: Python, Streamlit, Pandas, Scikit-learn (Gaussian Naive Bayes, ANOVA F-value, StandardScaler).

Sistem Pendukung Keputusan Pariwisata Madura dengan Metode SAW **Oct 2023 - Dec 2023**
Developed a web-based decision support system to rank tourism destinations in Madura using Simple Additive Weighting (SAW). Criteria include cost, distance, ratings, facilities, and access, with multi-level authentication. Role: Developer. Technologies: PHP 8.2, MariaDB, HTML5, JavaScript.

Toserba (Toko Serba Guna) **Sep 2023 - Dec 2023**

Developed an e-commerce platform for online buying and selling, with product inventory management and daily retail transaction workflows. Role: Developer. Technologies: PHP, MySQL, HTML, CSS, JavaScript.

Prediksi Kondisi Kesehatan Mental **Nov 2023 - Nov 2023**

Developed a web-based prediction system to classify potential mental health risks using daily and lifestyle indicators, including heart rate, sleep duration, daily steps, and mood. Role: Data Scientist. Technologies: Python, Streamlit, Pandas, Scikit-learn (Gaussian Naive Bayes), StandardScaler.

Hutan Mangrove Surabaya **Mar 2023 - May 2023**

Developed an ecotourism information website promoting the Mangrove Wonorejo conservation area in Rungkut, Surabaya, with a gallery, historical information, and real-time weather integration. Role: Developer. Technologies: HTML5, CSS3, JavaScript, OpenWeatherMap API, Google Maps API.

EDUCATION

Bachelor of Informatics Engineering **Aug 2022 - Jun 2026**

University of Trunojoyo Madura **GPA:** 3.81

- Developed web applications for school data, inventory, transactions, and service orders using PHP, Laravel, and MySQL.
- Built Python and Streamlit projects for mental health prediction, heart disease risk prediction, and nutritional status classification for young children.
- Applied decision support methods to tourism selection in Madura using SAW and rice seed variety selection using AHP, Fuzzy AHP, and TOPSIS.

AWARDS

Recognition as a Teaching and Quran Tutor - Beasiswa Pemuda Tangguh **Sep 2025**

Recognized by the Head of the Surabaya City Education Department for tutoring academic subjects and Quran learning through the Beasiswa Pemuda Tangguh program. Supported students from kindergarten through senior secondary level in community learning activities.

Recognition as a Teaching and Quran Tutor - Beasiswa Pemuda Tangguh **Jan 2025**

Recognized by the Head of the Surabaya City Education Department for tutoring academic subjects and Quran learning through the Beasiswa Pemuda Tangguh program. Supported students from kindergarten through senior secondary level in community learning activities.

SKILLS

Backend Development: PHP, Laravel, Python, FastAPI, Node.js, Express.js, RESTful API Development, API Integration, Backend Architecture, Data Storage, Data Processing, MySQL, PostgreSQL, Redis, Database Management System (DBMS), Database Optimization, Caching, Vector Search, Secure Transactions, Authentication and Authorization using JWT, Role-Based Access Control (RBAC), Third-Party Integration, Machine Learning Integration, Backend Performance Optimization.

Frontend Development: User Interface Design, HTML5, CSS3, JavaScript, TypeScript, Document Object Model (DOM), React.js, Vue.js, Next.js, Component-Based Architecture, Web Components, REST API Integration, Webpack, AJAX, Tailwind CSS, Bootstrap, Responsive Web Design, Frontend Performance Optimization, UI/UX Fundamentals, Prototyping, Human Interface Guidelines (HIG).

Cloud Computing & DevOps: Cloud Computing, Cloud Services, Amazon Web Services (AWS), Alibaba Cloud, Docker, Virtualization, Git, GitHub, Collaborative Git Workflows, Continuous Integration and Continuous Deployment (CI/CD), Managed Hosting.

Data Science & Machine Learning: Data Science, Natural Language Processing (NLP), Supervised Learning, Support Vector Machine (SVM), Neural Networks, Deep Learning, Data Visualization, Generative AI Fundamentals.

Mobile Development: React Native, Flutter, SwiftUI.

Project Management: Jira, Trello, Agile Principles, Team Coordination, Technical Project Collaboration.

Programming Concepts & Paradigms: Object-Oriented Programming (OOP), Procedural Programming, Logic Programming, Model-View-Controller (MVC), SOLID Design Principles, Swift Programming.

Software Engineering Practices: Clean Code, Code Testing, Code Quality Practices, Performance Optimization, Technical Documentation, Agile Development, Collaborative Development, Cross-Functional Collaboration.

Soft Skills: Leadership, Teamwork, Communication, Critical Thinking, Problem Solving, Time Management, Stakeholder Collaboration.

CERTIFICATIONS

Belajar Fundamental Front-End Web Development (Credential ID: 1OP87NQR8ZQK) by Dicoding Indonesia **Oct 2026**

Introduction to Cybersecurity (Cisco) by Cisco **Sep 2026**
